SAHIL NAIK

Java Developer | Software Engineer
Neral, Karjat, Maharashtra, India | 7775984977 | naiksahil071@gmail.com

PROFESSIONAL SUMMARY

Computer Engineering student (BE, 2027) and aspiring Java Developer with strong foundations in Core Java, Object-Oriented Programming, Data Structures and Algorithms. Hands-on experience building a multi-component Android + REST backend system as a final-year project team, along with individual projects, using Git/GitHub and SQL databases. Seeking a Java Developer role to build reliable, scalable, maintainable applications.

TECHNICAL SKILLS

Languages: Java, Kotlin, C++, C, Python, SQL, JavaScript
Core Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms, Collections Framework, Exception Handling, Multithreading basics
Backend & Databases: REST APIs, FastAPI, JDBC, MySQL, SQLite, Spring Boot (foundational)
Mobile: Android (Kotlin, Jetpack Compose) – basics
Web: HTML5, CSS3, JavaScript, Responsive Design, Streamlit
Tools: Git, GitHub, Eclipse / IntelliJ IDEA, VS Code
Soft Skills: Problem Solving, Team Collaboration, Communication

PROJECTS & EXPERIENCE

FactFlow (MCIE) – Multimodal Claim Intelligence Engine *2026 – Present*
Final-Year Project, Pillai HOC College of Engineering | Kotlin, Python, FastAPI, SQLite, spaCy, Gemini API

- Developed an Android and backend system in a team of 3 that lets users fact-check claims in short-form videos through a floating overlay bubble, without leaving the app.
- Contributed to a Python FastAPI backend with SQLite, covering video upload handling and a preprocessing pipeline using FFmpeg, PaddleOCR (on-screen text) and Whisper.cpp (speech transcription).
- Worked on an NLP claim-detection pipeline with spaCy: explicit claim detection, entity extraction, weighted confidence scoring and verification query generation.
- Integrated the Gemini API with web-search grounding to produce verdicts, exposed through REST endpoints that the Android app polls to show results.
- Collaborated under faculty guidance using Git and GitHub, with a test suite covering the preprocessing and claim-detection stages.

Voice Controlled Game System *Jan 2025 – Apr 2025*
Project Intern (Academic Project) — Pillai HOC College of Engineering

- Designed and developed a voice-controlled game using Python and speech recognition, applying object-oriented design principles.
- Implemented command-based input handling to improve accessibility for players with limited motor control.
- Collaborated in a team of 3 using Git and GitHub for version control, code reviews and branch management.

FrameWise – AI-Generated Media Detector *Personal Project*
Python, Streamlit, Pillow | github.com/naiksahil071-crypto/AI-DETECTOR

- Built a full-stack web application that analyzes videos and images (MP4, MOV, AVI, PNG, JPG) or social media links and reports an AI-generated confidence score.
- Designed a modular pipeline with separate components for media download, frame extraction, and detection/analysis, following separation-of-concerns principles.
- Developed an interactive, responsive UI with multilingual support (English, Hindi, Marathi), input validation and error handling for failed downloads or empty inputs.

EDUCATION

Bachelor of Engineering (BE) in Computer Engineering *2023 – 2027 (Expected)*
Pillai HOC College of Engineering and Technology, Rasayani, Maharashtra

CERTIFICATIONS

- Python for Beginners — Coursera
- Introduction to HTML & CSS — Great Learning
- Completed 2 academic software projects
